STYRTEKNIK

HECTOR-FOR TUFTING OF MATTRESSES

HECTOR presses the mattress together at the tufting point and sews a pattern, which provides a permanent compression of the mattress and keeps the fabric and filling in place. The pattern in the form of a circle or a line is fully adjustable between 4 and 25 mm. The number and length of the stitches are easily set with a touch screen display.

You can use HECTOR for mattresses up to 15 cm (optional lifting height of 20 cm is available) thick, fabric or leather, containing latex, polyether foam, crumb foam or fibre fill. Normal working rate is 8 to 12 operations per minute.

Arm length: Standard 60 cm
 Long 100 cm

Compatible with: MULTIPLE LINE, WANDA LINE

Optional: UV-light, Increased lifting height of presser foot 17 cm.

Standard equipment: Thread trimmer, position laser, double table.
