

HECTOR TWIN

Two head tufting

Two standard Hector machines are synchronised with adjustable needle distance. The distance can be set between 16,5 and 30,0 cm

OPERATION:

- The cushion is positioned by the operator who starts the automatic sewing.
- The diameter and number of stitches can be pre set.
- High speed sewing, approx. 8-10 pair of tuftings per minute.

FEATURES:

- Thick cushions up to 17cm can be sewn.
- Quick change of diameter and number of stitches.
- Automatic thread cutting.
- Two separate loading tables
- Easy to use.
- Prepared for upgrading to WANDA automat

ALTERNATIVE:

- WANDA a fully automatic inline production system, including a conveyor.
